ORGANICA CARES™

Seeds to Serenity

Landscape Designing

Landscape designing involves planning and arranging outdoor spaces for aesthetic and functional purposes

It includes elements like plant selection, hardscape features, and overall layout to create a visually appealing environment.

ORGANICA CARES™

Seeds to Serenity

Landscape Consultancy

Landscape consultancy services provide expert advice and guidance on various aspects of landscape design, construction, and maintenance.

Consultants work with clients to create customized plans based on their needs

ORGANICA CARES™

Seeds to Serenity

Irrigation (Drip and Sprinkler)

Landscape consultancy services provide expert advice and guidance on various aspects of landscape design, construction, and maintenance.

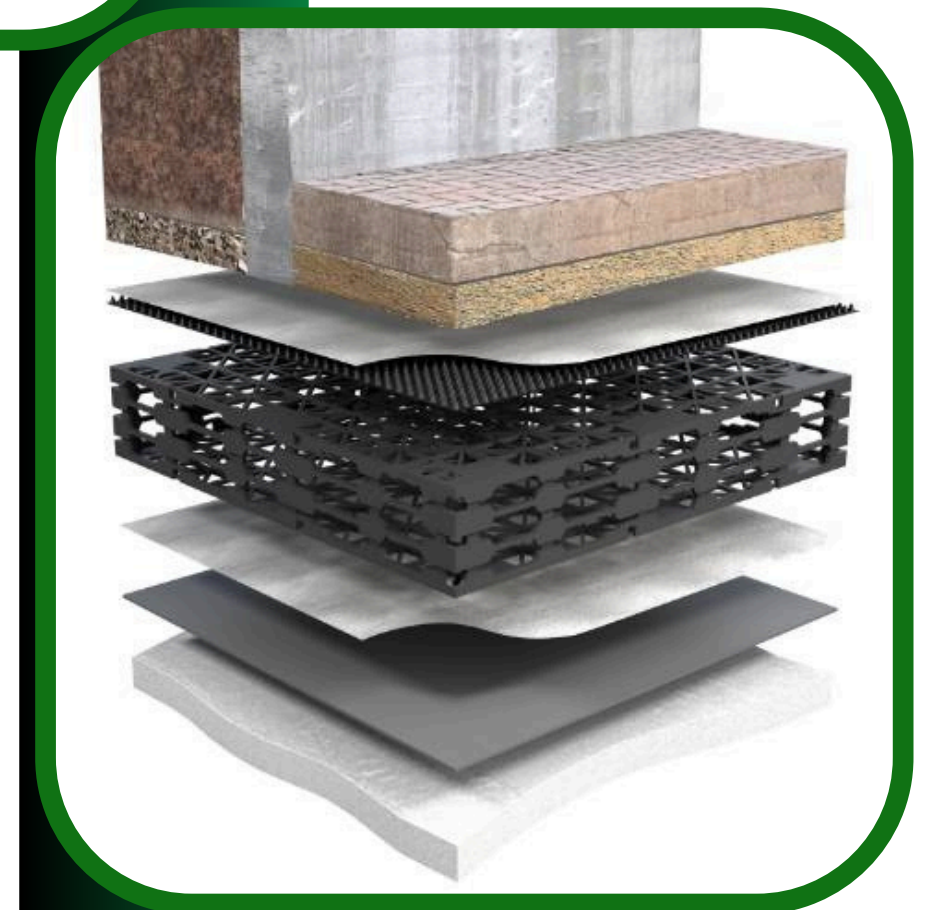

ORGANICA CARES™

Seeds to Serenity

Podium Gardens Drainage System

Podium gardens, often located on elevated structures, require specialized drainage systems to manage water runoff. Proper drainage ensures the health of plants and prevents water-related issues

PODIUM GARDEN

Podium gardens are elevated green spaces constructed on podiums or rooftops. They offer an aesthetic and recreational area while addressing environmental concerns such as urban heat islands.

LILY POND DEVELOPMENT

Lily pond development involves creating a habitat suitable for aquatic plants and organisms, with a focus on the aesthetic appeal of water lilies and other aquatic vegetation.

ORGANICA CARES™

Seeds to Serenity

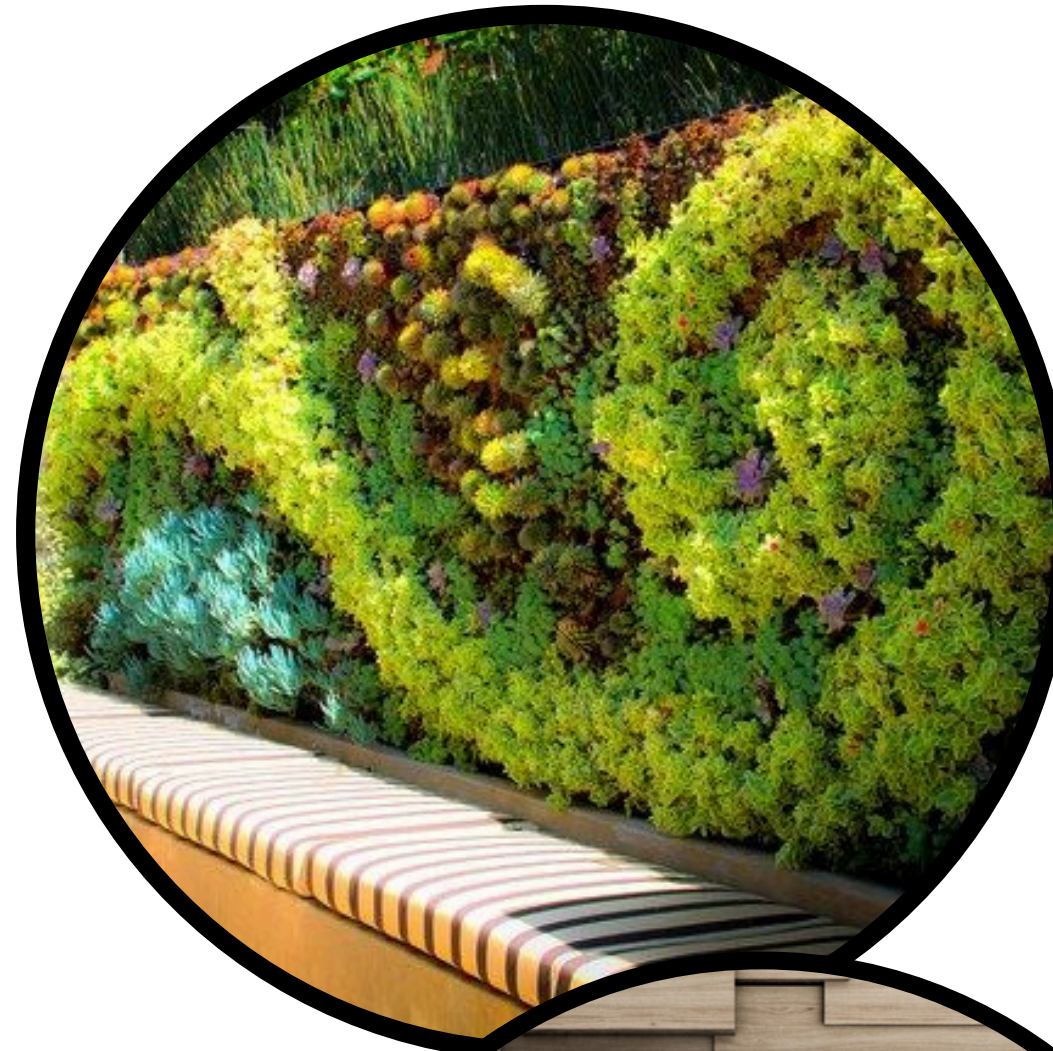

Garden Maintenance

Garden maintenance services involve ongoing care for plants, lawns, and outdoor spaces. This includes pruning, weeding, fertilizing, and other tasks to keep the

VERTICAL GARDEN AND BIO WALL

Vertical gardens and bio walls use vertical surfaces to grow plants. They are space-efficient and can enhance aesthetics while providing environmental benefits such as improved air quality

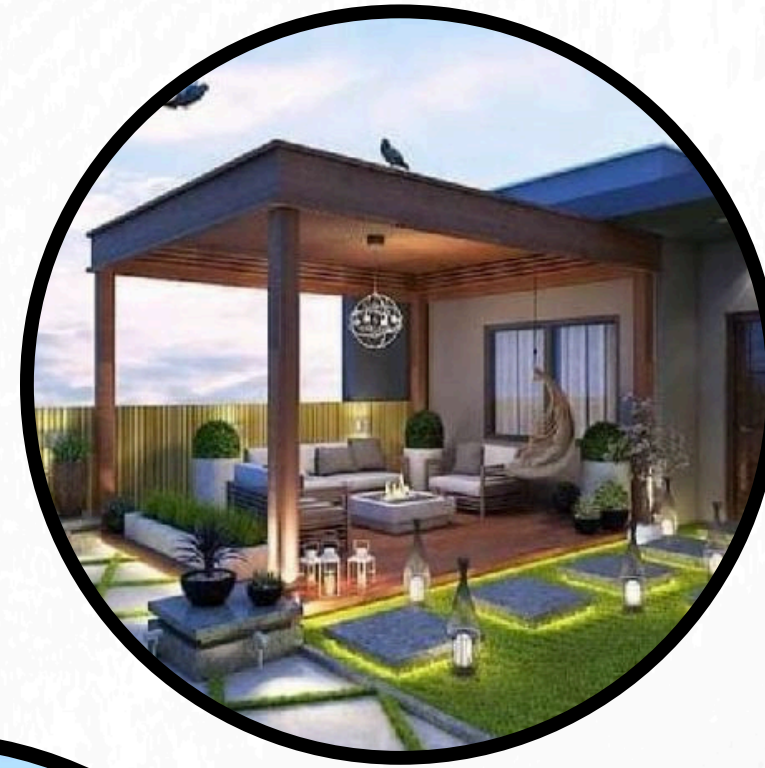

TERRACE GARDEN

Terrace gardens are gardens created on rooftops or terraces. They often involve container gardening, and careful planning to ensure structural integrity and proper drainage.

ORCHARD DEVELOPMENT

- Orchard development focuses on planning, planting, and maintaining fruit-bearing trees. It includes considerations such as soil health, pest management, and irrigation.

ORGANICA CARES™

Seeds to Serenity

Green Belt Development

Green belt development involves creating and preserving natural or semi-natural areas within urban or suburban areas. These belts contribute to environmental conservation and provide recreational spaces.

WATER BODIES AND FOUNTAINS

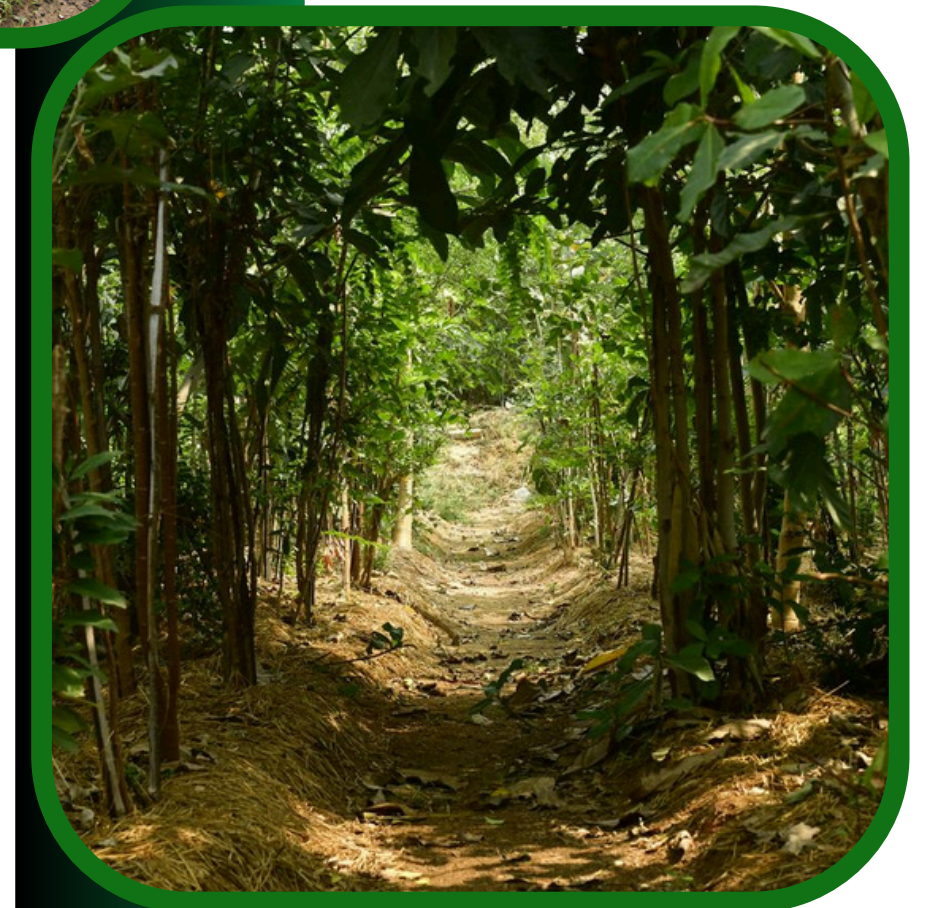

Designing water bodies and fountains enhances the aesthetic appeal of outdoor spaces. Water features can range from ponds and lakes to decorative fountains.

Miyawaki Plantation

Miyawaki plantation is a dense, multilayered planting technique that aims to create a natural forest ecosystem in a small area. It promotes biodiversity and sustainability

ORGANIC RECYCLING OF HORTICULTURAL WASTE

Organic recycling involves the conversion of horticultural waste, such as prunings and clippings, into compost or mulch. This sustainable practice reduces waste and enriches the soil.

TREE TRANSPLANTATION

Tree transplantation involves carefully uprooting and relocating mature trees to new locations.

This practice is often employed to preserve valuable trees in urban development projects.

TREE CENSUS

A tree census is a systematic survey and inventory of all trees within a specific area. It includes data on species, size, health, and location, providing valuable information for urban planning and conservation efforts.
